PLUMBING FAILURES & STANDARD of CARE EVALAUTIONS

Mr. Woodfield is experienced in the installation and repair of plumbing systems and components. He is also experienced in the installation, repair and service of pool and spa equipment. He is experienced and knowledgeable about the common industry practices for the repair and installation of plumbing, pool and spa equipment as well. He has received training and education with respect to the applicable codes, co-ordination of the trades and common safe practices in the industry. Being a trained independent adjuster gives him a unique perspective from which to evaluate plumbing related failures, installation problems and standard of care issues.
